Bundle & Save More – 800TS & 50TS Package Deal

Maximise your lab efficiency and save more when you bundle the Agilent BioTek 800TS Absorbance Reader with the 50TS Washer. This powerful combination streamlines your workflows for ELISAs, protein quantification, and more.

Bundle Pricing* from \$15,500 AUD/\$17,500 NZD.

EOFY25-BUNDLE

BONUS! 20% off Agilent Microplates

PROMO CODE

EOFY25-PLATES20

DNA Size Selection for NGS

10% off Sage Science BluePippin or PippinHT Instruments

Sage Science is the benchmark for DNA size selection prior to next-gen sequencing workflows such as PacBio, Illumina and Oxford Nanopore Technologies. BluePippin saves time and effort compared to manual gel purification, enables sample-to-sample reproducibility and allows higher sample quality for downstream analysis. PippinHT offers an efficient, automated solution for scientists running busy sequencing labs, core facilities, and other laboratories producing large-scale sequencing data.

MABTECH

ELISpot

FluoroSpot

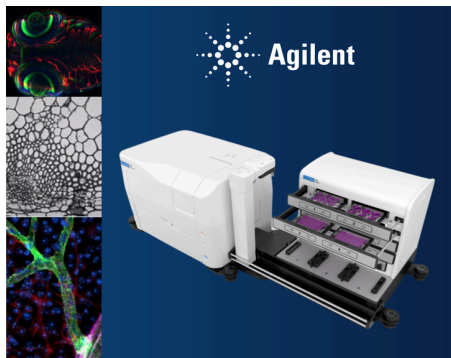

FociSpot

20% off Mabtech IRIS 2 FluoroSpot and ELISpot Reader

The Mabtech IRIS™ 2 FluoroSpot, ELISpot, and FociSpot reader analyses up to four analytes simultaneously with precision and speed. Powered by the Mabtech RAWspot™ algorithm, the IRIS 2 ensures accurate spot detection and counting. With user-friendly software, Mabtech Apex™, offers a simple plug-and-play system for streamlined workflows—just load the plate, select the assay, and press "read"!

PROMO CODE

EOFY25-IRIS2

Buy a Cytation C10 and receive 40% off a BioSpa 8

Elevate your cell imaging and analysis capabilities with the Cytation C10. Purchase one before June 30 and receive 40% off the BioSpa 8 Automated Incubator—enabling live-cell imaging with walk-away automation. This powerful pairing delivers continuous environmental control while supporting long-term kinetic studies.

PROMO CODE

EOFY25-BIOSPA

opentrons FLEX™

The future of lab automation is here

Get the Opentrons Flex Liquid Handler for \$38K AUD (>30% off!)

Automation is not just for pharma! Simplify your daily routine tasks with the Opentrons Flex - the most accessible and modular automation platform.

This special offer includes single channel pipette (1-50µl or 5-1000µl), delivery, onsite engineer installation, onsite introductory training*.

PROMO CODE EOFY25-FLEX

*Subject to instrument location, an additional fee may apply.

Agilent

NovoRinse
For Laboratory Use
1X

NovoClean
For Laboratory Use
1X

Purchase any NovoCyte and receive 6 months of Agilent NovoCyte fluidic consumables free*

Agilent flow cytometers provide exceptional performance, reliable data, and a user-friendly platform that helps researchers save time on experiment acquisition and analysis. Discover the innovative technology Agilent has integrated into flow cytometry to enhance your research and boost your productivity. The NovoCyte range offers up to 5 lasers and 30 fluorescence channels with conventional flow cytometry, and up to 73 detectors with Spectral flow cytometry, providing a flow cytometer solution for every need!

PROMO CODE EOFY25-NOVOCYTE

*T&C's apply. Consumables will support 6 months of operation, covering 8 hours of instrument run time, 5 days per week.

revvity

20% Off SMARTpool and SMARTvector Reagents

Advance your gene silencing projects with 20% off all Dharmacon SMARTpool and SMARTvector reagents. Whether you're working with siRNA or shRNA, these reagents deliver high knockdown efficiency with minimal off-target effects—ensuring reliable results for your research.

PROMO CODE EOFY25-SMART

PacBio

Higher DNA quality means better HiFi data

Buy Two or More Nanobind Kits and Receive a 10% Discount

Nanobind DNA Extraction Kits are designed for extracting high-quality, high molecular weight DNA from a variety of sample types including blood, bacteria and a wide range of animal and plant tissues. Utilising the unique Nanobind disc, these kits ensure minimal shearing and superior DNA integrity with minimal contaminants, making them ideal for applications such as long-read sequencing. The streamlined protocol delivers fast, efficient DNA isolation with exceptional yields, providing researchers with optimal DNA for accurate and reliable genomic analysis.

PROMO CODE EOFY25-NANOBIND

10x GENOMICS

Discover much more, for less!

10x Genomics Pilot Program: The proven single cell leader, now more cost effective than ever

Is cost holding you back from starting single cell research? Tailor a 10x Genomics solution to your budget, without sacrificing the proven performance that other single cell options can't match.

Affordable precision: Single cell delivers more critical insights than bulk sequencing
Efficient analysis: 10x Genomics' free, easy-to-use analysis pipelines let you process and visualise data without bioinformatics experience

Easy access: With demo instruments available, and a large numbers of instruments placed throughout Australia and in core facilities, access is not an issue.

PROMO CODE EOFY25-PILOT

Save 15% on Norgen Biotek DNA, RNA, Exosome, Protein & Virus Purification Kits

Experience high-performance purification with Norgen Biotek's Magnetic Bead Technology, optimised to capture all RNA sizes, including microRNA. Designed to minimise hands-on time and maximise efficiency, this advanced system ensures fast, reliable, and inhibitor-free nucleic acid extraction. Whether you prefer Norgen's spin column or magnetic bead system, achieve superior recovery and purity across diverse sample types.

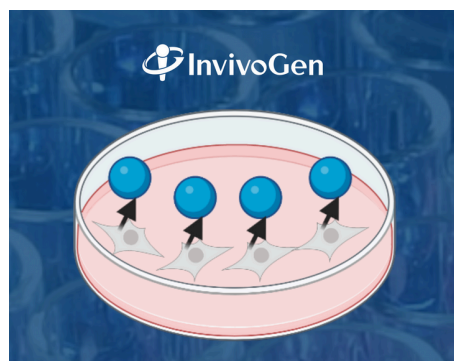

PROMO CODE EOFY25-PURIFY

Limited-Time Discounts on Meridian Bioscience DNA & RNA Kits & PCR Reagents!

Maximise your efficiency with bulk purchase offers on Meridian Bioscience (formerly Biotek) DNA & RNA purification kits, extraction controls, and PCR/qPCR/RT-PCR reagents. These solutions provide extraction-free, inhibitor-tolerant workflows with higher performance in the presence of inhibitors, ensuring better reproducibility. Inhibitors from sources such as blood, soil, plant material, or environmental samples can interfere with amplification even after purification. Our advanced technology delivers greater efficiency, improved sensitivity, and lower limits of detection with fast, reliable results. To find out which offers you qualify for, contact us now!

PROMO CODE EOFY25-MERIDIAN

Save 20% off when you order an InvivoGen Reporter Cell Line + Reporter Detection Kit

InvivoGen's reporter cell lines provide a powerful tool for monitoring immunological cellular responses with precision. Designed for versatility and reliability, these cell lines enable easy detection of key signalling pathways, gene expression, and immune responses, helping accelerate your research.

Order both an InvivoGen Cell Line and Detection Kit together to unlock an exclusive 20% discount, and elevate your research with reliable, high-quality tools from the specialists in innate immunology.

PROMO CODE EOFY25-REPORT

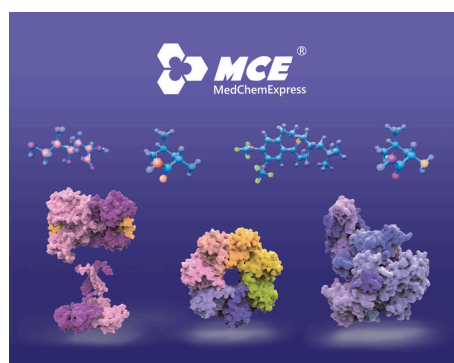

15% off all InvivoGen Mycoplasma Detection Kits

Working with contaminated cells can lead to disastrous results, unreliable experiments, lost time and wasted resources. Routine testing of cell cultures is crucial in maintaining healthy and happy cells.

To help you keep your research safe, InvivoGen offers easy-to-use and reliable mycoplasma testing kits that quickly detect contamination, ensuring your cell cultures remain optimal and contaminant-free. Don't miss out—get 15% off all InvivoGen MycoStrip and Plasmotest kits today!

PROMO CODE EOFY25-MYCOPLASMA

Save up to 20% off on essential research products from MedChemExpress

Known for their high-quality compounds, innovative reagents, and comprehensive drug discovery tools, MedChemExpress offers cost-effective solutions that accelerate your research without compromising on quality.

- 20% off ready-to-use compound screening libraries
- 15% off recombinant proteins, MCE kits, antibodies, fluorescent dyes
- 10% off reference standard compounds, siRNA products, bulk size products, custom synthesis services

PROMO CODE EOFY25-MCE

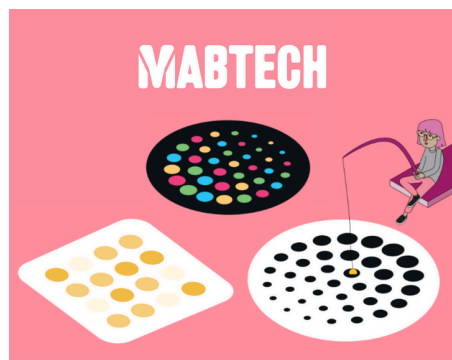

Discover 25% Off RayBiotech ELISA Kits* – Where Precision Meets Value

For sensitive and quantitative detection, RayBiotech ELISA Kits provide high-quality performance at competitive prices. With over 6,000 targets from 17 species, quick shipping, and rigorous quality control, you'll generate reliable data with confidence. Manufactured in the USA, our kits ensure precision for cytokines, growth factors, and more. Choose RayBiotech for fast, accurate results in your research.

PROMO CODE EOFY25-RAY25

*Valid on orders placed before June 25, 2025.

10% off FluoroSpot IFN- γ assay from Mabtech

FluoroSpot, the multiplex version of ELISpot, enables simultaneous analysis of multiple analytes using fluorescence, providing a broader picture of immune responses. It's perfect for studying highly functional cell populations, such as triple-secreting IFN- γ /IL-2/TNF- α cells or killer cells secreting both IFN- γ and Granzyme B. Take advantage of this exclusive promotion to enhance your experiments while saving. Order today and experience the quality and reliability that Mabtech products are known for!

PROMO CODE EOFY25-IFN

Unlock 20% Off*: Supercharge Your Study with Quality Cytokines, Growth Factors & More

FUJIFILM Irvine Scientific offers high-quality recombinant cytokines, antibodies, and proteins for academic and industrial research. Specialising in chemokines, cytokines, and growth factors, they provide reliable products developed in *E. coli*. The CTGrade GMP interleukins and growth factors are manufactured under cGMP practices in ISO 9001:2015 certified facilities. These products ensure consistent biological activity and performance, helping accelerate cell and gene therapy development with predictable results and reduced variability.

PROMO CODE EOFY25-FUJI

*Valid on orders placed before June 25, 2025.

Give Your Research a Boost: Enjoy 20% Off* Our Premium Biosimilar Antibodies this EOFY

Take this limited-time opportunity to enhance your research with Leinco Technologies' premium biosimilar antibodies—now at 20% off. As a leader in recombinant antibody development, Leinco ensures exceptional *in vivo* functional purity for reliable scientific discoveries. Their biosimilars provide high-quality alternatives to therapeutic antibodies without the high cost.

PROMO CODE EOFY25-LEINCO

*Valid on orders placed before June 25, 2025.

20% off xCELLigence RTCA Plates (E-Plates)

Agilent xCELLigence instruments monitor cell behaviour in real time under physiological conditions. They operate within a standard CO₂ cell culture incubator, with the control unit positioned outside the incubator. Using xCELLigence E-Plates enables continuous tracking of cellular responses, providing ongoing assay data throughout the experiment.

PROMO CODE EOFY25-EPLATE
