

New Year, New Lab.

Cell Analysis Promotions | Valid from February 9 - March 31, 2025.

Experience the Odyssey® F Imaging System

Request a demo today!

The Odyssey® F Imagers offer exceptional sensitivity, high throughput, and reliable data with faster scans at the click of a button. Featuring dual NIR lasers and two visible fluorescence lasers, the Odyssey® F is perfect for quantitative protein gels, Western blots, slide imaging, and more! Choose from 3- or 10-channel systems to meet your lab's imaging needs.

Scan the QR code to request your free demo. See how the Odyssey® F Imaging System can elevate your experiments.

Introducing the Mabtech ASTOR™ 2

ELISpot Analysis Redefined

Mabtech ASTOR™ 2 is a game-changer for ELISpot analysis, offering precise, effortless, and reproducible plate reading and spot analysis for a wide range of applications, such as assessing immune responses after infection or vaccination, rare cell studies, and CAR-T cell functionality. The ASTOR 2 is easy to use, enabling you to get right to your data. Just load the plate and press "read" for instant, reliable results – it's that simple!

Buy the Mabtech ASTOR™ 2 ELISpot reader and get 10% off your first ELISpot kit order! Use promo code 2025-ELISPOT10.

Lab Efficiency with the Agilent BioTek MultiFlo FX

Streamline Liquid Handling with Precision and Speed

The Agilent BioTek MultiFlo FX multimode dispenser streamlines liquid handling by replacing up to four dispensers and a washer. It enables fast dispensing, efficient washing, and gentle media exchange for cell-based assays. Its precision and flexibility enhance workflow efficiency, making it an essential tool for high-throughput laboratory applications.

Get 15% off when you buy the Agilent BioTek MultiFlo FX before March 31, 2025. Use promo code 2025-MFX15.

Stock up on Agilent BioTek Cassettes

Reliable Dispensing Solutions

Achieve precise, consistent dispensing with BioTek exchangeable tubing cassettes. Available in various sizes and tip types, they optimise workflow compatibility with Agilent BioTek microplate washers, dispensers, and combination systems.

Buy 2 or more Agilent BioTek Cassettes and receive 20% off your purchase. Use promo code 2025-CASSETTE20.

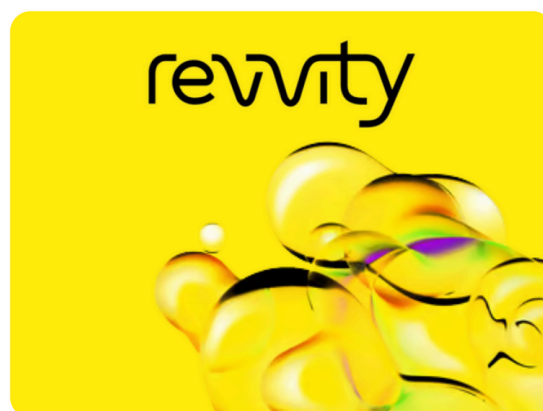

High-Performance Reagents for Targeted Research

Transforming Base Editing with Pin-point™ Precision

The Revvity Pin-point™ Base Editing platform enhances base editing by allowing simultaneous modification of multiple genes through its innovative three-part design. This CRISPR-Cas9-based technology enables precise genomic DNA modifications to silence disease genes, correct mutations, and improve cell therapies.

Save 15% on Revvity Pin-point™ reagents through to March 31, 2025, with promo code 2025-PIN15.

GelRed® – A Smarter Lab Solution

Ultra-Sensitive, Eco-Friendly DNA/RNA Gel Stain

GelRed® is the ultra-sensitive, environmentally safe alternative to Ethidium Bromide, offering unmatched performance in DNA/RNA gel staining. With superior sensitivity, room-temperature stability, and hassle-free disposal, GelRed enhances both efficiency and safety in your lab.

Buy GelRed® for \$189 (excl. GST). Use promo code 2025-GELRED when requesting your quote.

20% off Sample-Sized Rockland Antibodies

Kickstart Your 2025 Discoveries

Rockland's RFP and GFP Antibodies provide high specificity for gene expression, protein localisation, and *in vivo* analysis. Designed for tracking GFP/RFP expression, they detect native and variant forms. Versatile for various research applications, they are available with HRP, biotin, AP, and fluorescent dye conjugation options.

20% off sample-sized RFP and GFP Antibodies from Rockland with promo code 2025-SAMPLE.

Elevate your lab with Acro Biosystems

Collect your llama today!

Acro Biosystems provides recombinant proteins, antibodies, kits, and related products to support your success in cell and gene therapies, therapeutic antibodies, and protein workflows.

As part of our New Year, New Lab campaign, receive the highly coveted llama with every Acro Biosystems order placed by March 31, 2025.

The Gold Standard in Quantitative Metabolomics

biocrates' Ready-to-Use Metabolite Profiling Kits

biocrates' starter packages make it easy to integrate metabolomics into your lab. Whether identifying new biomarkers or analysing samples for population studies, these packages provide everything first-time users need to set up the kit, practice the workflow, and analyse ten samples.

Choose from the following starter packages:

- MxP® Quant 500 XL – The most comprehensive kit, analysing 1,019 lipids and small molecules.
- MxP® Quant 500 – Quantifies 630 metabolites for research in nutrition, microbiome, and disease.
- AbsolutelDQ® p180 – Covers 188 small molecules and lipids for clinical and epidemiological studies.
- AbsolutelDQ® p400 HR – Analyses 400 metabolites and lipids covering central metabolic pathways.

Save 25% on starter packages compared to purchasing individual components. Use promo code 2025-BIOCRATES25
