PacBio

\$182,500*
Onso™

Most cost-effective bench-top sequencer
Revolutionary sequencing chemistry

\$182,500 Highly Accurate Sequencer

PacBio Onso's superior accuracy makes it a powerful tool for any sequencing application and workflow - from basic research to clinical diagnostics.

The system's user-friendly interface and robust performance makes it a standout choice for researchers and clinicians seeking reliable and advanced sequencing solutions.

PROMO CODE

EOY-ONSO

 **sage science**

DNA Size Selection for NGS

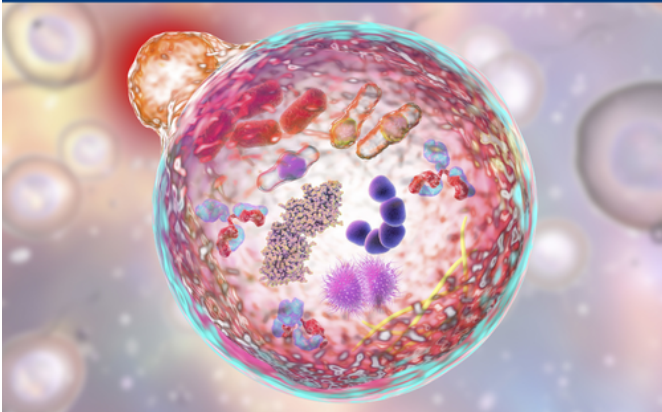

10% off Sage Science BluePippin or PippinHT instruments

Sage Science is the benchmark for DNA size selection prior to next-gen sequencing workflows such as PacBio, Illumina and Oxford Nanopore Technologies. BluePippin saves time and effort compared to manual gel purification, enables sample-to-sample reproducibility and allows higher sample quality for downstream analysis. PippinHT offers an efficient, automated solution for scientists running busy sequencing labs, core facilities, and other laboratories producing large-scale sequencing data

PROMO CODE

EOY-PIPPIN

 **Agilent**

20% off Agilent BioTek LogPhase 600 & Synergy instruments

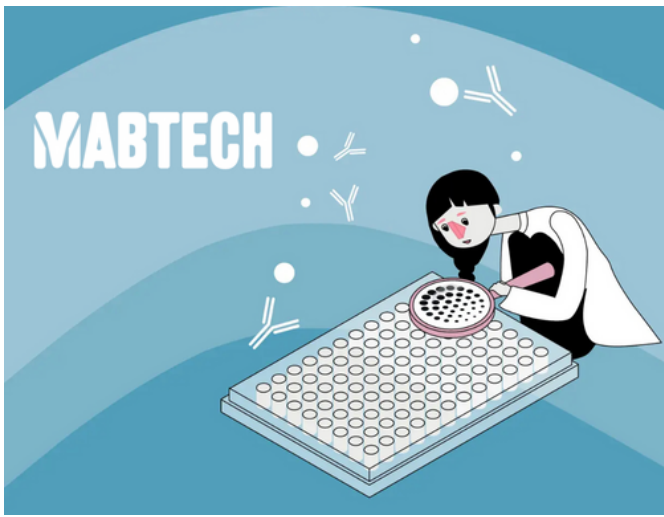

This is an extraordinary opportunity for deep savings on Agilent instruments for cell, microbial or biochemical assays.

The Agilent BioTek LogPhase 600 microbiology reader are designed for measuring microbial growth curves in up to four standard 96-well microplates. The Agilent BioTek Synergy instruments are a configurable multimode microplate reader capable of performing a wide variety of assays including absorbance, luminescence or time resolved or polarised fluorescence. Both instruments exemplify Agilent BioTek's renowned ease of use and bullet-proof robustness.

10% off Mabtech ELISpot IFN- γ assays

ELISpot is a cell-based immunoassay designed to quantify protein-secreting cells at the single-cell level. Its ability to detect one cell in a million makes ELISpot one of the most sensitive cellular assays available and a powerful tool for cancer and infectious disease research. Whether you're researching rare cells, profiling T or B cells, or assessing responses to new vaccines, Mabtech ELISpot assays are the perfect solution for your needs.

PROMO CODE

EOY-ELISPOT

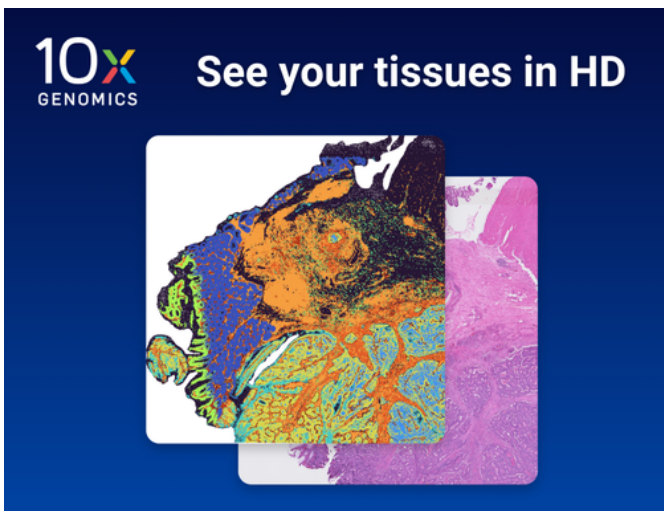

25% off 10x Genomics GEM-X

Jump into the world of single cell assays with the advanced GEM-X technology. Optimised reagents and redesigned microfluidic chip architecture makes the assay more sensitive, more robust, and provides higher throughput, enabling more powerful insights in every facet of biology. The Chromium platform standardises the scRNA-seq workflow, making reliable, reproducible, and impactful single cell insights accessible to every researcher, no matter their skill level or expertise.

PROMO CODE

EOY-GEMX

*Valid until December 13, 2024.

25% off 10x Genomics Visium HD Spatial Gene Expression

Discover whole transcriptome gene expression at single-cell scale and dive deep into unique biology of your precious sample. Obtain best-in-class data from every micron of tissue with the simplest workflow supported by the CytAssist instrument. It enables you to section your sample on to a plain glass slide and perform H&E or IF staining, followed by the Visium HD workflow. Visium HD is compatible with fresh frozen, fixed frozen and FFPE samples.

PROMO CODE

EOY-HD

*Valid until December 13, 2024.

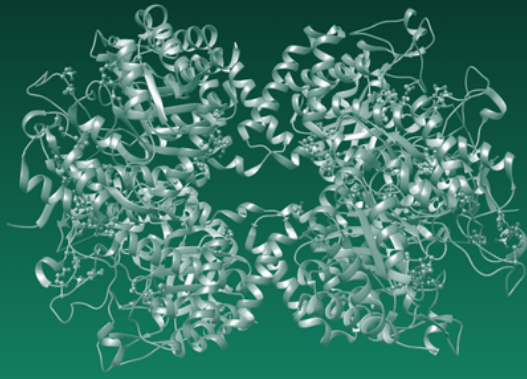

\$20 PCR, qPCR & RT-PCR Trial Kits

This is the perfect opportunity to test, optimise, and experience the performance of Meridian Bioscience (Bioline)'s inhibitor-tolerant and highly sensitive enzyme and molecular mixes. Don't miss this limited-time offer to enhance your research with our advanced mixes, enabling direct DNA/RNA amplification from crude samples without extraction, as well as our cDNA synthesis, PCR, qPCR, and RT-PCR products.

PROMO CODE

EOY-TRIAL

SB SinoBiological

Buy 2 Sino Biological Recombinant Proteins, Get 1 FREE

Sino Biological is a leading biotechnology company offering more than 6,000 recombinant proteins for research in areas such as SARS-CoV-2, immune checkpoints, antibody drug targets, CAR-T cell therapy targets, Fc receptors, and cytokines.

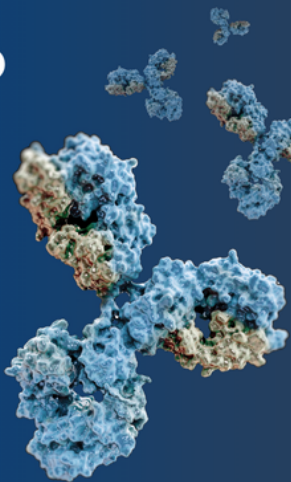

Buy 2 Sino Biological recombinant proteins and get 1 FREE! Stock up now and accelerate your research with this limited-time offer. Don't miss out - order before the year ends!

PROMO CODE

EOY-SINO

ROCKLAND

- Epitope Tags
- Secondary Antibodies
- TrueBlot® for IP/WB
- Supporting Reagents

15% off Lab Essentials from Rockland

For over 60 years, Rockland have produced and manufactured antibodies and reagents. Their products go through rigorous quality-control testing and multi-assay validation for consistent performance.

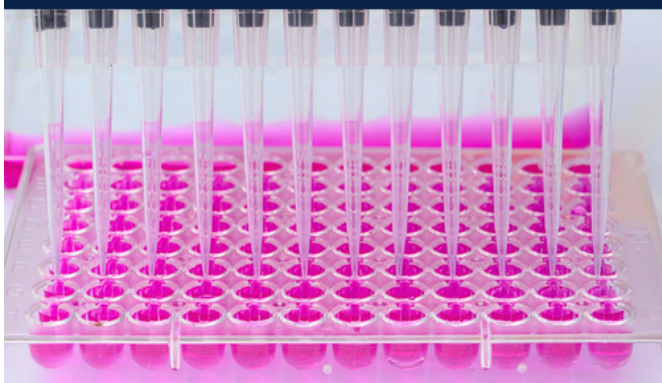

Get 15% off on all Rockland lab essentials, from top-quality antibodies to must-have reagents, trusted by researchers worldwide.

PROMO CODE

EOY-ROCK

Cloud-Clone Corp.

CUSABIO®

ELISA Extravaganza! Boost your research with top-quality ELISA kits

25% off all Cusabio ELISA kits.

Cusabio is trusted for precision and reliability in research areas such as immunology, cancer, and cardiovascular studies.

PROMO CODE

EOY-CUSABIO *Valid until December 13, 2024.

Buy 3 Cloud-Clone ELISA Kits, get 1 FREE!

Or 20% off Cloud-Clone ELISA kits.

Cloud-Clone are renowned for their wide range of products and exceptional quality control.

PROMO CODE

EOY-CLOUD *Valid until December 6, 2024.

Agilent

20% off Agilent xCELLigence Real Time Cell Analysis Microplates

Agilent xCELLigence instruments measure cell behaviour in real time, under physiological conditions. They function within a typical CO₂ cell culture incubator, with the control unit located outside the incubator and utilise xCELLigence E-Plates to continuously monitor cell response in a 96-well format. Capture continuous cell assay data throughout the duration of your experiment.

PROMO CODE

EOY-EPLATE

Spring clean your cultures

Up to 15% off Antimicrobial Agents

Working with contaminated cells can lead to disastrous results, unreliable experiments, lost time, and wasted resources. Microbial contaminants, whether mycoplasma, bacteria, or fungi, can be avoided and eliminated using the right antibiotic formulations from InvivoGen.

To help you keep your research safe, InvivoGen have prevention and elimination options available that act rapidly without damaging your precious cells.

PROMO CODE

EOY-CLEAN

15% off LICORbio reagent kits

LICORbio reagent kits are known for their reliability and accuracy in molecular and protein analysis applications such as Western Blotting. With a strong reputation for quality and consistency, these kits deliver robust results that researchers can trust.

Take advantage of a 15% discount on LICORbio reagent kits to enhance your lab's workflows with these dependable tools.

PROMO CODE

EOY-LICORBIO

50% off Revvity CRISPR reagents and 15% off CRISPR libraries

Dharmacon CRISPR reagents provide high-quality, reliable tools for gene editing, enabling precise and reproducible results across a variety of research applications. With a wide range of options, including guide RNAs, Cas9 proteins, and ready-to-use CRISPR libraries, Dharmacon supports targeted gene disruption, activation, and repression. Now, with 50% off CRISPR reagents and 15% off CRISPR libraries, it's the perfect opportunity for researchers to access these powerful tools at a reduced cost, streamlining workflows and accelerating scientific discovery.

PROMO CODE

EOY-CRISPR

15% off RNA/DNA Purification Kits* + FREE Bottle of Ultrapure Nuclease-Free Water

Maximise yields from challenging samples by efficiently capturing total or fragmented nucleic acids from tough sources such as FFPE. Ensure contamination-free results from the start by isolating pure RNA from cells and tissues without interference from other cellular components.

*Only available on selected cell and tissue products.

PROMO CODE

EOY-NORGEN

*Valid until November 26, 2024.

Issues with Tissues? Norgen to the Rescue!
